## **PROFESSIONAL SUMMARY**

I am a self-taught full-stack software developer with a Bachelor's Degree in Sociology from Egerton University Njoro. In tandem with my academic pursuits, I have cultivated a profound interest in the field of technology. To augment my proficiency, I have proactively pursued several educational courses on platforms like Udemy. Additionally, through self-guided study using online resources, such as YouTube, I have acquired a comprehensive skill set encompassing website development, both on the front-end and back-end.

My work methodology is characterized by meticulous attention to detail and a well-structured approach, ensuring precision in every task I undertake. I excel in performing under tight deadlines, demonstrating a capacity for efficient and expedient work. As a goal-driven full-stack developer, I am unwavering in my commitment to collaborative efforts and adept at problem-solving, acknowledging the pivotal role of teamwork in achieving project excellence

## **SKILLS**

- Planning and Organizing: I am a Hardworking collaborator with track record of superior results.
- I am Skillful at creating servers and databases for functionality and designing and developing APIs.
- Collaboration skill: Being a self-taught developer, I have learnt that in order to grow I must learn how to collaborate with others. This has become an integral part of me.
- Team work: Working on a team is most exciting for me. It is like bringing a puzzle together from each person and see the whole structure become a reality using Of version control tools (i.e., Using git).
- Communication Skills: The ability to give feedback has become an integral part of me since working with others demands this.
- Passion: I'm a Tech-savvy Full Stack Web Developer proficient in fundamental front-end languages and server-side languages.

- Work Ethic: I am very Analytical and precise professional with 3 years of hands-on experience taking charge of front and back-end web development.
